DIGITAL LITERACY

(Project Report)

Course Code: CSE0001

Faculty: Kannan

Name: Swarnima Sah

Registration Number: 25BAI10597

Branch: B.Tech (AI ML)

INTRODUCTION

Digital literacy is an essential skill in today's technology-driven world. It involves the ability to effectively use digital tools, platforms, and communication methods in a responsible and secure manner. As a Student Digital Ambassador, this project aims to build awareness about digital platforms, professional communication, and online safety among students.

This portfolio includes five tasks that cover important aspects such as creating digital content, building an online presence, exploring learning platforms, practicing professional communication, and understanding cybercrime. Through this project, I gained practical experience in using various tools and learned how to maintain a responsible digital identity. The overall objective is to enhance digital skills and promote safe and effective use of technology in academic and professional environments.

TASK 1:

DIGITAL LITERACY INFOGRAPHIC

For this task, I created a digital literacy infographic using Canva, which is an easy-to-use online design tool. The infographic focuses on key aspects of digital literacy, including the definition of digital literacy, safe internet practices, and useful digital tools for students.

The design highlights the importance of being aware of online risks, maintaining a professional digital presence, and using tools like Google Workspace and GitHub for academic purposes. I used simple visuals, icons, and concise text to make the infographic clear and engaging for students.

One interesting aspect of this task was learning how to present information visually instead of using long text. However, it was slightly challenging to organize all the information in a single page while keeping it visually appealing. Overall, this task helped me understand how to communicate important ideas effectively through design.

TASK 2 :

STUDENT DIGITAL PORTFOLIO

In this task, I created and updated my profiles on three important platforms: GitHub, LinkedIn, and Kaggle. Each platform serves a different purpose in building a strong digital presence.

GitHub is used for showcasing technical work and projects. I created a profile README that includes my name, branch, and learning goals. It will help me maintain a portfolio of my coding and academic projects over time.

LinkedIn is a professional networking platform where I added my education details and created a basic professional profile. It will help me connect with peers, seniors, and professionals, and explore internship and career opportunities.

Kaggle is a platform for data science and machine learning practice. I created an account to explore datasets, participate in competitions, and improve my analytical skills.

Over the next four years, I plan to actively use these platforms to build my skills, showcase my work, and create a strong professional identity.

TASK 3 :

EXPLORE CODING & COLLABORATION PLATFORMS

In this task, I explored both coding and collaboration platforms to understand their academic usefulness. For the coding practice part, I used HackerRank and successfully solved a beginner-level problem. This helped me understand how to approach coding questions, improve logical thinking, and get familiar with programming environments. It also gave me confidence to practice more problems in the future.

For the collaboration part, I used Google Forms to create a Digital Literacy Awareness Quiz consisting of six questions. I included both multiple-choice and short-answer questions. I also viewed the responses in Google Sheets, which helped me understand how data is collected and analyzed in real time.

These tools are highly beneficial for academic growth. HackerRank will help me improve my coding and problem-solving skills, which are essential for technical subjects and placements. Google Forms is useful for conducting surveys, quizzes, and collecting feedback efficiently. Overall, this task

helped me gain practical experience with tools that will support my learning throughout my academic journey.

TASK-4

DRAFT A PROFESSIONAL EMAIL & ETIQUETTE GUIDE

Poor digital communication can lead to serious misunderstandings and problems.

For example, a student once sent an email to a professor requesting an assignment extension, but the email had no subject line and used informal language. The message was unclear and appeared unprofessional, so the professor overlooked it and did not respond on time. As a result, the student missed the deadline and faced unnecessary stress.

This situation could have been avoided by following proper email etiquette. The student should have included a clear subject line, used a formal tone, and structured the message properly with a polite request. Effective digital communication ensures that messages are understood correctly and taken seriously. This highlights the importance of being clear, respectful, and professional while communicating online.

Social Media Do’s and Don’ts

Do’s

- Use privacy settings to control who can view your profile and posts.
- Share positive, informative, and meaningful content.
- Verify information before posting or sharing it.
- Be respectful and polite in comments and interactions.
- Maintain a professional and responsible online presence.

Don’ts

- Do not share personal or sensitive information publicly.
- Avoid posting offensive, abusive, or inappropriate content.
- Do not engage in online arguments or cyberbullying.
- Avoid clicking on suspicious or unknown links.
- Do not spread fake news or unverified information.

TASK 5 :

CYBERCRIME AWARENESS CASE STUDY & PREVENTION GUIDE

While researching about cybercrime, what surprised me the most was how easily people can become victims of phishing attacks. Many fake messages and websites look almost identical to real ones, making it difficult to identify them. I realized that even a small mistake, like clicking on an unknown link or sharing an OTP, can lead to serious financial loss and misuse of personal information.

This made me more aware of the importance of being cautious while using the internet.

One habit I will personally change is verifying the authenticity of every link, message, or email before taking any action. I will avoid clicking on suspicious links and will never share sensitive information such as passwords or OTPs with anyone. This awareness will help me stay safe online and prevent cyber fraud.

CONCLUSION

This project helped me understand the importance of digital literacy in today's world. Through the various tasks, I learned how to use digital tools effectively, build a professional online presence, communicate properly through emails, and stay aware of cyber threats. Each task provided practical knowledge that can be applied in both academic and real-life situations.

I also realized the importance of responsible online behavior and maintaining a positive digital identity. Overall, this project improved my confidence in using digital platforms and enhanced my awareness about safe and effective communication in the digital world.
